Application/Control Number: 09/842,086

Art Unit: 1752

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a silver halide photographic light-sensitive material comprising a compound represented by formula (1) characterized by containing a chromophore represented by formula (2), classified in class 430, subclass 579.
 - II. Claims 6-12, drawn to a silver halide light-sensitive material comprising a compound represented by either formula (4) or formula (5), classified in class 430, subclass 574.
 - III. Claims 13-16, drawn to a silver halide light-sensitive material comprising a compound represented by formula (6), classified in class 430, subclass 572.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions each have different effects resulting from respectively containing the different compounds (1), (4) or (5), and (6).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/842,086

Art Unit: 1752

3. Claim 13 is generic to a plurality of disclosed patentably distinct species containing a compound represented by formula (6) comprising a "first" chromophore and a "second" chromophore. Applicant is required under 35 U.S.C. 121 to elect a single disclosed chromophores species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to Mark Boland on August 19, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 09/842,086

Art Unit: 1752

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geraldine Letscher whose telephone number is 703-308-3208. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Baxter can be reached on 703-308-2303. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
